Dear Mr. Kieling:

SUBJECT: Request for Supplemental Information (RSI) for the October 1998, General Part B Permit Application, Revision 1.0 (General Part B), Los Alamos National Laboratory (LANL), EPA I.D. NM0890010515

The purpose of this letter is to request a 30-day extension for the response to the above-mentioned RSI for the LANL General Part B. We received the RSI on March 31, 2000. The original response date was thirty days from receipt of the RSI or April 29, 2000. We are asking for an extension until May 29, 2000 to respond fully to your requests as outlined below.

Following up on a conversation you had with Jack Ellvinger, LANL, on April 12, we are asking for this extension to provide additional time for the collection, certification, and document production of the requested information. As stipulated in the RSI, modifications of the text and content of sections of the permit application will involve complete replacements and redline/strikeout versions of the sections. The scope of Question 7 of the RSI was also discussed and we have received clarification from Rosalie Winn of your staff on April 14, 2000. Our current understanding is that we will provide complete waste characterization documentation for examples of all LANL waste categories contained in the General Part B Waste Analysis Plan rather than a comprehensive characterization summary table as had been previously discussed. Our response to Question 7 is therefore anticipated to require a significant amount of generator and storage facility record copying.

If you should have any questions or concerns associated with this request, please feel free to contact me at 665-0677 or Gian Bacigalupa at 667-1579.
