Mr. Steve Pullen
Permits Management Program
Hazardous Waste Bureau
New Mexico Environment Department
2905 Rodeo Park Drive East, Building 1
Santa Fe, New Mexico 87505-6303

Dear Mr. Pullen:

Subject: Response to Materials Requirement List – Los Alamos National Laboratory (LANL)

The purpose of this letter is to fully respond to your information request regarding specific waste characterization conditions in the LANL hazardous waste facility permit. The information contained in these response answers the ten questions given to LANL representatives during the facility inspection beginning on April 1, 2003. The questions were contained in the document titled "Materials Requirement List," dated March 31, 2003. Most of this information was previously presented or verbally discussed during the inspection.

The response consists of a list of the ten questions with associated answers and attached supporting documentation. Italics in the response highlight the original questions.

If you should have any further questions concerning this submittal, please contact me at (505) 667-1579.

Sincerely,

Gian Bacigalupa
Solid Waste Regulatory Compliance Group
