Permit

NOTICE OF CLASS 1 MODIFICATIONS
Los Alamos National Laboratory
Resource Conservation and Recovery Act Hazardous Waste Facility Permit

The U.S. Department of Energy (DOE) and the University of California (UC) have submitted a Class 1 modification to change the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit. This modification was submitted to the New Mexico Environment Department's Hazardous Waste Bureau on February 16, 2006 and was fully implemented at LANL's permitted container storage units on May 15, 2006. This modification updated/revised the inspection record form that is included within the inspection plan. It is an administrative and informational change that does not change the frequency or content of the inspections conducted.

The modification was prepared in accordance with the New Mexico Administrative Code, Title 20, Chapter 4, Part 1 (20.4.1.900 NMAC) (incorporating Code of Federal Regulations [CFR], Title 40 § 270.42(a)(1)), revised October 1, 2003. Changes to the inspection record form were necessary in order to aid in maintaining consistency in the method for performing inspections at hazardous waste management units across LANL. If you have any questions regarding this modification please contact Jack Ellvinger at (505) 667-0633 or jee@lanl.gov.
