Subject: RE: LANL Hazardous Waste Permit - Dissemination of Contingency Plan

Mr. Connolly,

I agree DHSEM is the central point of information gathering and distribution and having a single point of contact is a more efficient use of time and manpower during an emergency.

Thank you,

Donald

Subject: LANL Hazardous Waste Permit - Dissemination of Contingency Plan

Mr. Donald Mathiasen
Area 3 Local Area Preparedness Coordinator
Department of Homeland Security and Emergency Management
13 Bataan Blvd.
PO Box 27111
Santa Fe, NM

Don,

As we discussed, I wanted to get your approval to include wording in the Los Alamos National Laboratory (LANL) Hazardous Waste Permit that would put the onus on your position at the State DHSEM to disseminate information from LANL to the Emergency Managers at the Counties, Pueblos, and Jicarilla Apache Nation that lie within Area 3. The information would specifically be (at the writing of this but subject to change) Attachment D – Contingency Plan of said permit. Of course, Area 3 includes the following locations:

Los Alamos County;
Rio Arriba County;
Taos County;
Santa Fe County;
City of Santa Fe;
the Eight Northern Pueblos; and
the Jicarilla Apache Nation.

Based on your acknowledgement that the State DHSEM would be a good central location for emergency management information to be distributed from, we plan to include wording in the hazardous waste permit that requires the permittee to "provide a copy of their contingency plan, and any revisions, to the State DHSEM Area 3 Local Area Preparedness Coordinator", with the assumption that the coordinator will disseminate that document to the proper emergency managers, as listed above.

Please respond to both myself and Steve Pullen, permit writer/manager copied here, with your agreement or disagreement to this and feel free to give some brief reasoning.

Thanks for your time, Don.

Stephen
