**Subject:** LANL Permit

Good Afternoon,

I am writing in support of the Los Alamos National Laboratory open burning portion of the Permit. I disagree with the decision to remove open burning from the draft hazardous waste renewal permit. Vital national security work would be sacrificed with no appreciable benefits to human health or the environment. I support LANL being allowed to continue its important mission of counterterrorism, explosives detection, and improvised explosive device countermeasures. I believe that burning at LANL in a secure, controlled, remote setting is safer than transporting the materials on public roads to another facility.

Thank you for the opportunity to express my views.
