

Permit

4/22/2010

 ENTERED

People may either return a completed petition here or may ask for a blank one to take with him.

33685

My name is Stan Primak. My family and I live in Los Alamos and I operate a small business here. I am here today in my capacity as Chairman of the Board of Directors of the Los Alamos Commerce and Development Corporation and Los Alamos Chamber of Commerce. Our Board represents about three hundred member businesses and organizations throughout our community and area that employ thousands of citizens in Northern New Mexico.

We support approval of the proposed hazardous waste facility permit for Los Alamos National Laboratory (EPA ID No. NM0890010515);

Furthermore,

... we find that no reasonable rationale based on health, safety, or environmental concern has been presented by the NM Environment Department or any other party for denial of Los Alamos National Laboratory's permit for the open burn units at TA-16;

that,

... the LANL operations and capabilities supported by the LANL open burn capability are important to the security and safety of our armed forces and the nation in general;

and that,

... the LANL operations and capabilities supported by the open burn capability are important to the present and future economy of New Mexico;

For these reasons, we respectfully request that the NM Environment approve the referenced permit to include the requested permission for the open burn units at TA-16-388 AND TA-16-399.

In addition, our Chamber of Commerce made a petition available at our office over the past weeks so that people could come by and sign to indicate their agreement with our position.

If appropriate, I would like to present to you today the signed petitions (fanned out and wave in air) as additional input into your proceedings. (Hand them petitions)

Chamber Advocacy Notes

2010 has been a very busy year already in terms of the number of important issues that we have been involved in and contributing input to. I would like to offer some brief summaries. Links to more detailed information that is available on the web are provided where applicable.

If you have questions about any of these advocacy areas, contact Member Services Coordinator Katy Korkos at 661-4816, or email chamber@losalamos.org

The Chamber through its participation on the MainStreet Futures Committee presented and discussed three policy recommendations for improving prospects for progress toward the downtown vision with the County Council. The recommendations had to do with ways to streamline business interactions with the County, remove causes of confusion and uncertainty, and solve issues of land assembly that are a barrier to potential redevelopment.

Recommendations to County Council

County Charter Review - The Chamber has provided input to the County's Charter Review Committee to oppose a number of ideas that have been suggested to change the way that the County makes capital investment and real estate decisions. We believe that the suggested changes would be detrimental to the community.

Input provided to committee

County Charter Review Committee Page

State Legislature -- While the State legislature is in session we are involved in a variety of advocacy activities mostly as participants in larger groups such as the NM Chamber Execs Association, Association of Commerce and Industry, NM Industrial Development Executives Association, and the NM MainStreet Coalition.

Wayfinding Signage Improvement -- We have advocated for improved signage for helping visitors to find their way around the County. A first phase of signage improvements is being developed and the hope is that it will be in place before the summer. A second phase involving a more comprehensive planning effort is anticipated after the phase 1 completion.

LANL Hazardous Waste Permit: National and Local Impacts - The Chamber has taken the position of supporting full renewal of the permit by the the New Mexico Environment Department (NMED). NMED is proposing denial of a portion of the permit and will be conducting hearings in April to gather input. After evaluating the NMED information including LANL response to NMED concerns, it is clear that NMED agrees that there are no health concerns nor consequential environmental concerns related to granting the permit. Their reasoning is based on the balance of public input being in opposition with little input having been received in support. We believe that there would be negative national security and NM economic impacts from the denial.

The Chamber has created a petition that we invite all interested parties to sign. You can either print it out, sign, and return to the Chamber. Or you can stop by the Chamber and sign. You are encouraged to gather other signatures.

Background Materials:

- NMED Notice of Action/Hearing (April 5)
- NMED Fact Sheet Explaining Proposed Denial
- NM Environment Department webpage
- LANL Fact Sheet
- Key Facts One-pager

Chamber Petition

Economic Vitality Strategic Plan - The Chamber has participated with Los Alamos County in their drafting of an Economic Vitality Strategic Plan (EVSP) and have participated in County public input sessions to collect input for improving the draft.

Draft EVSP

Public Comment Notes Introducing Plan

Progressive news & commentary for Los Alamos' future

The Chamber facilitates a public blog at blog.laprogress.info as a collecting place and repository for news and opinions that are consistent with the progressive agenda of the Chamber.

SAVING THE BRICK & MORTAR
OUR NATION IS BUILT ON

The Chamber has been a continuing voice for the importance of supporting local business interests. This message is delivered through a variety of channels including www.fyiLA.com, op-eds published in the Los Alamos Monitor and at blog.laprogress.info, the Essence of Los Alamos & White Rock, the Chamber's Facebook fan page, and video spots that have run at the Reel Deal and on Comcast (example below)

Trinity Advisory Committee - The Chamber participates on the County's Trinity Advisory Committee.

We, the undersigned, state that:

... we support approval of the proposed hazardous waste facility permit for Los Alamos National Laboratory (EPA ID No. NM0890010515);

... we find that no reasonable rationale based on health, safety, or environmental concern has been presented by the NM Environment Department or any other party for denial of Los Alamos National Laboratory's permit for the open burn units at TA-16-388 AND TA-16-399;

... the LANL operations and capabilities supported by the LANL open burn capability are important to the security and safety of our armed forces and the nation in general;

and,

... the LANL operations and capabilities supported by the open burn capability are important to the present and future economy of New Mexico;

For these reasons, we respectfully request that the NM Environment approve the referenced permit to include the requested permission for the open burn units at TA-16-388 AND TA-16-399.

We, the undersigned, state that:

... we support approval of the proposed hazardous waste facility permit for Los Alamos National Laboratory (EPA ID No. NM0890010515);

... we find that no reasonable rationale based on health, safety, or environmental concern has been presented by the NM Environment Department or any other party for denial of Los Alamos National Laboratory's permit for the open burn units at TA-16-388 AND TA-16-399;

... the LANL operations and capabilities supported by the LANL open burn capability are important to the security and safety of our armed forces and the nation in general;

and,

... the LANL operations and capabilities supported by the open burn capability are important to the present and future economy of New Mexico;

For these reasons, we respectfully request that the NM Environment approve the referenced permit to include the requested permission for the open burn units at TA-16-388 AND TA-16-399.
