Attached is the copy of the perchlorate letter that went out to DOD today. Originally this letter was intended to be a follow up to a meeting that FFRRO and FFEO had with DOD a few weeks ago to discuss their draft guidance on perchlorate sampling and analysis. However, before we could finalize it, DOD issued a revision of its draft guidance, as a result the letter, which had been nearly finished, had to be modified so that it was a reply to the "revisions" that DOD made to the draft. Also attached are the original DOD draft guidance and their revised version that was issued last week. Apparently the suggestions that we made in our meeting regarding the guidance weren't really considered when DOD was making the revisions. Once again thanks for everyone's assistance on this letter, all the input was extremely helpful.
