FROM : John Enders, H-1

SUBJECT: SOLID RADIOACTIVE WASTE DISPOSAL REPORT FOR THE THIRD QUARTER OF 1966

SYMBOL :

1768 Report

This report covers disposal activities for the third quarter of 1966 and includes cost data as well as data of volume of waste discarded. Some of this data is based on estimates and this fact should be kept in mind if any conclusions are to be drawn from this report.

Data for the report has been furnished by the Zia IM and R Section, Eng-4 Group, the Zia Tech Janitorial Section, SP-3 Group, the Zia Supply Div. and LA Notebooks #6905 and 12442.

Area C:

Disposal well #93 and 100 have not yet been filled, but will probably be closed out by the end of the year.

In anticipation of some "fill dirt" being made available as a result of the demolition of TA-45, it has been suggested that some of this dirt be placed in pit #4, Area C, as the ground has sunken over a large area of this pit as much as two feet in places and filling in of these areas should be done.

Area G:

Pit #5 was dug during this quarter and its dirt stockpiled on top of pit #3. Pit #4 continued to receive routine waste material and it is anticipated that when scrap material from TA-45 is received that this pit will be nearly filled. One out-of-town shipment was received and buried in pit #4. The off-loading and burial were without incident.
