*1325 Report*

Most of the month was spent on the geologic mapping project either in literature review or field work. Karin Budding arrived on the 13th to act as my field assistant for the summer. Some time was spent in her orientation. Pueblo and Bayo Canyons have been covered now as well as North Mesa, Barranca Mesa and the canyon north of Barranca Mesa.

Several days were spent in ordering binders for my report, "History and Environmental Setting of LASL Near-Surface Land Disposal Facilities for Radioactive Wastes (Areas A, B, C, D, E, F, G, and T)."
