MAIL STOP: 490

1378
Report

Joint studies were made by Karin Budding on the end of North Mesa, the end of 35th St. off of Orange, and on Mesita del Buey near the horizontal-hole drilling platform.

Twelve thin sections sent by G-6 were studied.

Samples were collected for thin section work from Units 1a, 1b, 2a, 2b, 3a, 3b, and Tschicoma Fm. Finished sections were received on the 30th.
