**SUBJECT: ANNUAL HAZARDOUS WASTE TREATABILITY STUDY REPORT  
FOR CALENDER YEAR 2006**

This letter constitutes the hazardous waste treatability study report for calendar year (CY) 2006 for the Los Alamos National Laboratory (LANL), EPA ID NM0890010515. This report is required annually by New Mexico Administrative Code, Title 20, Chapter 4, Part 1, Section 200 (20.4.1.200 NMAC) as revised October 1, 2003, (incorporating 40 CFR § 261.4(f)(9)).

There were no treatability studies conducted at LANL during CY 2006 and, at this time, there are no new studies planned for CY 2007. A notification for a planned treatability study was sent to your office on January 11, 2006; however, that study was not conducted due to acceleration of the schedule for vacating the facility where the study was to be conducted. The waste (approximately 1 kilogram of lithium hydride) was subsequently transported to Technical Area 54 for shipment and ultimate disposal offsite.

In the event that a treatability study is proposed for this year, a notice of intent to conduct a study will be prepared and submitted to your office at least 45 days prior to beginning the study, as required by 20.4.1.200 NMAC (incorporating 40 CFR § 261.4(f)(1)). If you have any questions regarding treatability studies at LANL please contact Jack Ellvinger at 505-667-0633.

Sincerely,

Anthony R. Grieggs  
Group Leader  
Water Quality and RCRA Group
