

memorandum

Albuquerque Operations Office
Los Alamos Area Office
Los Alamos, New Mexico 87544

DATE: AUG 02 1994

REPLY TO

ATTN OF: LESH:2TT-001

SUBJECT: EPA Response to Notification of Two New Solid Waste Management Units (SWMU) and Six New Areas of Concern (AOC) for Operable Unit 1071

TO: Jorg Jansen, Program Manager, EM/ER, LANL, MS-M992

EPA has responded to the subject letter, dated July 5, 1994. Their response letter, which was received at LAAO on July 26, 1994, is provided as an attachment to this memorandum.

The EPA response includes a request for additional information which will allow them to determine if AOCs C-0-037 and C-0-038 should be classified as SWMUs. This material should be delivered to LAAO for internal review no later than August 15, 1994, so that our comments may be considered for document preparation before it is submitted to EPA on August 19, 1994. Also, please arrange for a briefing, at your earliest convenience, on your plans for addressing EPA's recommendation for signs and/or fences on the units. Since the AOCs are located on National Park land near a heavily used recreational area, we are particularly concerned with how the Park will receive this recommendation and what concerns they may have for posting or limiting access to the units.

The work plan for sampling and analysis at SWMU 0-039 is due to EPA by October 24, 1994. The NMED Underground Storage Tank Bureau should also be notified of this schedule for work plan preparation. Please submit the draft work plan for review at LAAO by October 17, 1994.

Should you have any questions or comments, please call me at 665-7203, or Bonnie Koch, Scientech, at 665-7202.
