RE: No Further Action Required at TA-0, 6th Street Site, Los Alamos National Laboratory, Los Alamos, New Mexico

Dear Mr. Vozella:

The New Mexico Environment Department has reviewed the 45 day Minimum Site Assessment Report received on January 18, 1996 for the above-referenced site. The Department has determined that this site does not pose an immediate public health or environmental threat for the following reasons:

1. The horizontal extent of soil contamination has been adequately defined. The vertical extent of soil contamination has been adequately defined and is greater than 900 feet above high static ground water.
2. Contaminated soils have been excavated and properly disposed.
3. Depth to ground water at the site is greater than 1000 feet below ground surface.

Based on this information, the Department requires no additional work at this time, although it reserves the right to do so should petroleum hydrocarbon contamination resulting in a threat to public health or the environment is discovered.

Thank you for your cooperation in this matter.

Sincerely,

Anthony Moreland
Geologist
Underground Storage Tank Bureau
