**SUBJECT: REMEDIAL ACTION FOCUS SAMPLING AT TA-0,
 PRS 0-030(g)**

Dear Mr. Garcia:

Remedial Action Focus Area is planning to conduct sampling at Technical Area (TA) 0, Potential Release Site (PRS) 0-030(g) on or about August 24, through August 28, 1998. The sampling will consist of final confirmation sampling activities associated with the former location of PRS 0-030(g), septic tank #6, which was removed as part of a Resource Conservation and Recovery Act Facility Investigation (RFI). A minimum of seven samples from six locations will be collected from soil/tuff underlying the former location of the septic tank and associated vitrified clay pipe (VCP). Borings will be less than 15 feet deep and will be drilled using the MinuteMan drilling equipment. Survey work to relocate the former septic tank and VCP is scheduled to occur the week of August 17. Drilling and sampling activities are scheduled to begin on August 24 and last for approximately two days.

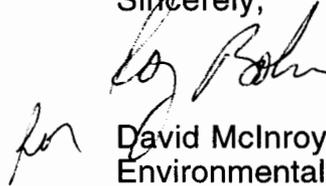

Samples will be collected and best management practices will be installed as shown in the table below.

Location	Number of Samples	Sample Type	Analyses
Boreholes (6) PRS 0-030(g)	7	soil/tuff	TAL metals, VOCs, SVOCs, PCB/Pesticides, isotopic plutonium, isotopic uranium, Americium 241

If you have any questions or concerns, please call me at (505) 667-0819.

Sincerely,

David McInroy
