SUBJECT: REMEDIAL ACTION FOCUS AREA SAMPLING AT PRS 0-019

Dear Mr. Garcia:

The Remedial Action Focus Area is planning to collect samples at PRS 0-019 on or about February 11 through 28, 1999. The samples will be collected prior to proposed Voluntary Corrective Action (VCA) activities to augment extent of contamination and for preliminary waste characterization purposes. Minimal site restoration is anticipated due to the limited nature of the sampling effort and upcoming VCA activities, which will consist of geodetic surveying, trenching, sub-surface sampling, drilling, and pipe removal (if practicable), building demolition (pumphouse), soil removal from outfall areas, and confirmation sampling.

Samples will be collected as shown in the table below.

Location	Number of Samples	Sample Type	Analyses
Sub surface	20-30	Sediment/tuff	Isotopic Pu, isotopic uranium, gamma spectroscopy, VOC, SVOC, Inorganic, Pest/PCB
Pipe contents	20-30	Pipe contents	Isotopic Pu, isotopic uranium, gamma spectroscopy, Tritium, VOC, SVOC, Inorganic, Pest/PCB

If you have any questions, please call me at (505) 667-0819.

Sincerely,

for Dave McInroy
