SUBJECT: REMEDIAL ACTION FOCUS SAMPLING AT PRS 0-019

Dear Mr. Bearzi:

The Remedial Action Focus Area is planning to complete the confirmation sampling associated with Voluntary Corrective Action (VCA) field activities at Potential Release Site 0-019 on or about July 14 through July 30, 1999. The VCA activities consist of building demolition, subsurface pipe removal, soil removal from an outfall area, and confirmation sampling. These activities are outlined in the VCA Plan for PRS 0-019 (LA-UR-99-1707), which was submitted to the New Mexico Environment Department Hazardous and Radioactive Materials Bureau on April 30, 1999 (EM/ER:99-107).

Subsequent to removal of structures or soil, confirmation samples will be collected as shown in the table below.

Location	Number of Samples	Sample Type	Analyses
Within building footprint	4	Soil/tuff	Isotopic Pu, isotopic uranium, gamma spectroscopy, PCBs, pesticides, SVOCs, and TAL metals
Within pipeline trench	24	Soil/tuff	"
Outfall Area	4	Sediment/tuff	"

If you have any questions or concerns please feel free to give me a call at (505) 667-0819.

Sincerely,

A handwritten signature in purple ink, appearing to read "D. McInroy".
