Santa Fe, NM 87502

SUBJECT: SAMPLING NOTIFICATION

Dear Mr. Kieling:

The Los Alamos National Laboratory's Environmental Restoration Project is planning re-sampling activities at Potential Release Site 0-030(g) on or about September 28, through September 30, 1999. The re-sampling is being done as a result of the field team inadvertently missing two sample locations during the original sampling campaign and not having all of the sample locations analyzed for pesticides. This sampling effort will complete the scope of sampling activities as described in the "Sampling and Analysis Plan for Solid Waste Management unit 0-030(g), Outfall Drainage Area," submitted to your office in February 1999.

Samples will be collected as shown in the table below.

Plan/Document	Location	Number of Samples	Sample Type	Analyses
"Sampling and Analysis Plan - Solid Waste Management Unit 0-030(g), Outfall Drainage Area"	Surface and subsurface	2	Sediment/soil	Isotopic Pu, isotopic uranium, isotopic Americium, gamma spectroscopy, PCBs, pesticides, and TAL metals
EM/ER: 99-040	Surface and subsurface	14	Sediment/soil	Pesticides

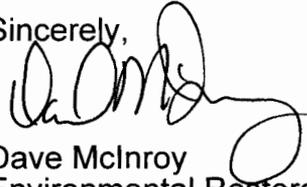

ASWA LANL 1/10/11/0/0-030(g)

72

If you have any questions or concerns please feel free to give me a call at
(505) 667-0819.

Sincerely,

Dave McInroy
Environmental Restoration Project
