Subject: Land Transfer Review

Ted,

I am responding to your e-mail to Sandra Martin dated January 6, 2004.

As you probably know, the Consent Order does not exist anymore, including any negotiations that were incorporated into it. As of January 1, 2004, the Order issued on November 26, 2002 is in effect. There is no legal language on land transfer protocol in the Order. However, the Department believes it is appropriate to continue to follow the language drafted for land transfer for the Consent Order and is endeavoring to do so.

The Department understands that its response regarding its position on SWMUs and AOCs on A-8 was due 60 days following the November 3rd meeting, which was January 2. Given the holidays, we were unable to mail the response to you until the following business day (January 5). I am attaching an electronic version of the response for your convenience. The Department has grave concerns with the work that has been done at this tract and has outlined in detail the additional work that needs to be done in order to get an NFA for the SWMUs. At this time, I would not recommend proceeding with a permit modification request because, based on the Department's concerns, it is a wasted effort on DOE's part.

If you have any questions, feel free to call me at 428-2548.

Darlene
