RE: Response to Notice of Intent to Discharge for Los Alamos National Laboratory, Purge Water from Alluvial Monitoring Wells in Los Alamos Canyon, DP Canyon and Pueblo Canyon

Dear Mr. Rae:

The New Mexico Environment Department (NMED) received a Notice of Intent on April 22, 2005 for the discharge of up to 100 gallons of purge water from 5 alluvial monitoring wells (LAO-B, LAUZ-1, LLAO-1b, LLAO-4, and PAO-4) in Los Alamos Canyon, DP Canyon and Pueblo Canyon. The notice satisfies the requirements of Section 20.6.2.1201.A of the New Mexico Water Quality Control Commission (WQCC) Regulations (20.6.2 NMAC).

Based on the information provided in your Notice of Intent (NOI), NMED has determined that a Discharge Permit is not required for this single sampling event as long as the discharge is as described. A Discharge Permit is not required because the information you provided indicated it is unlikely that the proposed discharge will adversely impact ground water.

The exempt discharge is briefly described as follows: A one-time discharge of a maximum of 100 gallons from purging of ground water from alluvial monitoring wells LAO-B, LLAO-1b, LLAO-4, LAUZ-1 and PAO-4 will be discharged to the land surface in the vicinity of the purged well.

Although a Discharge Permit is not being required for this discharge at this time, you are not relieved of liability should your operation result in actual pollution of surface or ground waters. Further, this decision by NMED does not relieve you of your responsibility to comply with any

other applicable federal, state, and/or local laws and regulations, such as zoning requirements, plumbing codes and nuisance ordinances.

If at some time in the future you intend to change the amount, character or location of your discharge, or if observation or monitoring shows that the discharge is not as described in your NOI, you must file a revised NOI with the Ground Water Quality Bureau.

If you have any questions, please contact either Chris Vick of the GWPPS staff at 505-827-0078 or George Schuman, Program Manager of the Ground Water Pollution Prevention Section, at 505-827-2900.

Sincerely,

William C. Olson, Chief
Ground Water Quality Bureau
