Re: 24 No Further Action Proposals
Los Alamos National Laboratory
NM0890010515

Dear Mr. Vozella:

The Environmental Protection Agency (EPA) has reviewed the document dated November 2, 199³ which contains 24 No Further Action (NFA) proposals for 24 Solid Waste Management Units at Operable Unit (OU) 1078. Contingent on approval from the New Mexico Environment Department (NMED), Los Alamos National Laboratory (LANL) may request a Class III permit modification to remove those SWMUs which are currently in the HSWA permit. Los Alamos does not need to add to the HSWA permit those SWMUs which are currently not in the permit.

Even though several of these units, such as 1-007(h) and 1-006(m), should not have been identified as SWMUs, LANL may want to continue an investigation under the Environmental Restoration program to address any potential residual radiation. Should you have any questions, please contact Barbara Driscoll at (214) 655-7441.

Sincerely,

William K. Honker, P.E.
Chief
RCRA Permits Branch (6H-P)

William K. Honker, Chief
RCRA Permits Branch
Hazardous Waste Management Division
U. S. EPA, Region 6
1445 Ross Ave., Suite 1200
Dallas, TX 75202-2733

Dear Mr. Honker:

Enclosed are 24 No Further Action (NFA) Proposals for 24 Solid Waste Management Units (SWMUs) at Operable Unit (OU) 1078, Los Alamos National Laboratory. The NFA proposals all follow the same format, and include the same or similar criteria as those used to generate five trial proposals that your staff previously approved. Seven of these proposals replace proposals in the OU 1078 Resource Conservation and Recovery Act Facility Investigation Work Plan, and include materials not previously presented for these SWMUs. The NFA proposals present documentation supporting the proposal that each SWMU or area of concern be approved for the NFA.

If you have any questions about the enclosed proposals, please call Ted Taylor of my staff at 8-505-665-7203.

Sincerely,

Joseph C. Vozella, Chief
Environment, Safety, and Health
Branch
