Voluntary Corrective Action Completion Report
1-001(f)
February 2, 1996

General Comments: This report addresses the interim measure associated with uranium contamination near some condominiums and does not present conclusions or make recommendations as to any further actions that may or may not be taken at this PRS.

1. Page 1, first paragraph: LANL should clarify what chemical contamination if any was associated with the upper and lower outfall areas.
2. Page 3, second paragraph: LANL should clarify what the corresponding cancer risk level is equivalent to the 15 mrem/yr dose level.
