**RE: STATUS OF PERCHED-INTERMEDIATE WELL SCI-4
EPA ID #NM0890010515
HWB-LANL-MISC-GW**

Dear Messrs. Rael and Graham:

The New Mexico Environment Department (NMED) is in receipt of the United States Department of Energy (DOE) and the Los Alamos National Security, L.L.C.'s (collectively, the Permittees) document entitled *Status of Perched-Intermediate Well SCI-4* (Letter) dated March 17, 2011 and referenced by EP2011-0121.

The Permittees state in the Letter that, in accordance with the NMED-approved October 29, 2010 drilling work plan for well R-62, data collected during drilling of R-62 will be used to assess the need for well SCI-4. The Permittees further state that they intend to submit relevant correspondence regarding SCI-4 within 30 days after the completion date of well R-62, which is June 30, 2011.

In the NMED-approved *Phase II Investigation Work Plan for Sandia Canyon*, dated July 30, 2010, the Permittees proposed to submit a drilling work plan for SCI-4 (Plan) by February 28, 2011. Although the installation of SCI-4 is contingent on data from R-62, the Permittees are not precluded from submitting the Plan at any time before the completion of R-62. No later than five

Messrs. Rael and Graham

days after reaching the total drilling depth of well R-62, submit the Plan or notify NMED that intermediate zones of saturation were not encountered during drilling of R-62. If perched groundwater is present at the location of R-62, commence the installation of well SCI-4 within 90 days of completion of well R-62.

Should you have any questions, please contact Jerzy Kulis of my staff at (505) 476-6039.

Sincerely,

James P. Bearzi
Chief
Hazardous Waste Bureau
