To: File
From: Kim T. Hill, Environmental Engineer *KTH*
Subject: Lou Roberts (6EN-AT)
EPA Region 6 TSCA Program
Record of Communication
Regarding PCBs at 3-056(c)
Date: May 30, 1997

MEMORANDUM

CONFIDENTIAL

On the morning of Thursday May 29th, I contacted Ms. Lou Roberts to inquire regarding various issues at 3-056(c). One such issue was which Agency/Program had the lead regarding the PCB cleanup levels at 3-056(c). Ms. Roberts indicated that the EPA's Regional Office is asserting its authority over this site.

Ms. Roberts stated that she had provided LANL with a TSCA-prescribed cleanup level of 1 ppm in May 1996. Since that time, she has received additional information from various sources (including LANL) and knows that new PCB toxicity data is currently available that could potentially allow a lower cleanup level at 3-056(c). Therefore, Ms. Roberts intends to review the available information in the near term and confer with Maria Martinez, an EPA toxicologist, in order to confirm or revise her previously stated 1996 cleanup level. She intends to provide this decision to LANL and NMED by Friday, June 6th.
