SUBJECT: SAMPLE NOTIFICATION AT TA 3, PRSs 3-027 AND 3-014(v)

Dear Mr. Bearzi:

On approximately June 16, 1999, the Los Alamos National Laboratory Decontamination and Decommissioning Group is planning to collect confirmation samples following the demolition of the former service station at Technical Area 3, (TA-3-36). Any stained soil will be removed prior to sample collection. Surface and near-surface soil samples will be collected from Potential Release Site (PRS) 3-027, the location of sumps/lift wells located in the former TA-3 service station, and from PRS 3-014(v), the location of floor drains in the former TA-3 service station. A total of twelve samples will be collected, four from beneath the floor drains and eight from beneath the sumps/lift wells to confirm cleanup.

Samples will be collected as shown in the table below.

Location	Number of Samples	Sample Type	Analyses
PRS 3-027	8	Surface and near-surface soil beneath sump/lift wells	VOCs, PCBs, metals (TAL), and TPH
PRS 3-014(v)	4	Surface and near-surface soil beneath floor drains	VOCs, PCBs, metals (TAL), and TPH
