SUBJECT: SAMPLING NOTIFICATION

Dear Mr. Kieling:

The Los Alamos National Laboratory (LANL) Environmental Restoration (ER) Project is planning to collect samples as part of the Voluntary Corrective Action (VCA) activities at Potential Release Site (PRS) 3-056(c), on or about August 10 through November 30, 2000. VCA activities involve the removal of polychlorinated biphenyl (PCB) remediation waste at the site. Pre-excavation samples will be collected and analyzed for PCBs using EnSys test kits and fixed laboratory procedures to establish a correlation between the two methods; the test kits will then be used on a daily basis to drive excavation activities. Post verification samples will be collected to confirm the cleanup activities.
