RE: Approval of the VCA Report under the Toxic Substance and Control Act (TSCA)  
761.61(c) for PCB Site 3-056(c) at Los Alamos National Laboratory (LANL)

Dear Mr. Johansen:

The Environmental Protection Agency (EPA) has reviewed LANL's VCA Report (received October 2, 2001) for Site 3-056(c) under 40 CFR 761.61(c) and hereby grants approval. LANL has demonstrated that they have met the cleanup standard of less than 1 ppm and therefore the risk assessment is not applicable. The 1 ppm cleanup level was approved by EPA in August of 1995. Please be aware that this determination is being made under TSCA and that LANL must satisfy the New Mexico Environment Department for a RCRA determination of the site.

Should you have any questions, please feel free to contact Mr. Rich Mayer of my staff at (214) 665-7442.

Sincerely,

David Neleigh, Section Chief  
New Mexico - Federal Facilities
