Santa Fe, NM 87505-6303

SUBJECT: SAMPLING NOTIFICATION PRS 3-010(a)

Dear Mr. Young:

The Los Alamos National Laboratory Risk Reduction and Environmental Stewardship, Industrial Sites Team, is planning to collect samples during geotechnical investigations associated with Facility work for a parking lot structure at TA-3. The Program Management (PM) division at the Laboratory will be drilling a borehole to collect samples for further characterization of the material for the foundation of the parking lot. The Remediation Program will take the opportunity to collect samples that may help in defining the extent of residual contamination near PRS 3-010(a). This PRS is listed on Table A of the Module VIII of the Laboratory's Hazardous Waste Facility Permit. The sampling activities will involve collecting core samples from a borehole near building SM-30 at TA-3

These samples are anticipated to be collected on or about April 2, 2003. Samples will be collected as shown in the table below.

Plan/Document	Location	Number of Samples	Sample Type	Analyses
Response to RSI RFI Report Addendum for PRS 3-010(a), LANL, NM0890010515, HWB-LANL-01-005	One borehole to ~40 ft South of SM-30 at TA-3	Minimum of 4, maximum of 6	Subsurface tuff	<ul style="list-style-type: none"> • Volatile organics • Tritium

If you have any questions or concerns please call Gabriela Lopez Escobedo at (505) 665-7352.

Sincerely,

David McInroy
