File Name (owner) Darlene Goering		
Person David Gregory DOE Firm Gabriela Lopez Escobedo UC/LANL	Phone No. 667-5808	Recorded By:
Subject: SWMU 3-010(a) Geophysics Presentation		
Remarks: Trying to determine if + when to meet. Right now, Gabriela says she feels strongly that they have a good handle on the groundwater situation + we just have a difference of opinion. Geophysics results are not conclusive but, coupled with all other information, can help make a strong case. David says the results of the geophysical investigation does not offer compelling evidence or else they would have given us the report by now. However, geophysics + new borehole data help fill in gaps for the alluvial system.
