Mr. John Young, Corrective Action Project Leader
Permits Management Program
NMED – Hazardous Waste Bureau
2905 Rodeo Park Drive East
Building 1
Santa Fe, NM 87505-6303

SUBJECT: SAMPLING NOTIFICATION

Dear Mr. Young:

The Los Alamos National Laboratory (LANL) Environmental Stewardship-Remediation Services Project is planning to conduct characterization sampling associated with the Accelerated Corrective Action (ACA) at consolidated Solid Waste Management Unit (SWMU) 61-002 and Area of Concern 03-001(i), Technical Areas 61 and 3. The sampling schedule is to begin on or about March 1, 2005.

The ACA Work Plan for these sites submitted December 3, 2004 (LA-UR-04-07879) will be used to guide the sampling of soils potentially contaminated by former Laboratory operations at the sites, as summarized in the attached table. These characterization samples will be collected prior to the excavation activities planned at the sites later this spring or summer. A separate notification will be submitted prior to confirmation sampling that will be performed following excavation at the sites. Please note that we have included Volatile Organic Compound (VOC) analysis at SWMU 61-002 as requested by your staff during a visit to the site on January 20th, 2005.

If you have any questions regarding this sampling, or to arrange a site visit, please contact Roy Bohn at (505) 665-5138.

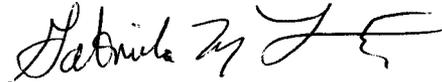

Mr. John Young
