Subject: Future Uses of TA-6 Area on Two Mile Mesa

Richard, At this moment, FMU 67 has no plans for development on this old site. The existing buildings at TA-6 have been turned over to the E. R. program for Decontamination and Decommissioning. However, we have many other buildings that also have been turned over to E.R. for removal. To date, nothing has happened from this effort.

The only development I am aware of is through FE-8, Utilities and Infrastructure, that plans a new 315 KV high voltage line to serve power to the Laboratory. There will be a new substation in this vicinity and power lines crossing the area when it is constructed. David Padilla, FE-8 is the best contact for this project.
