The survey at this time need be only a cursory inspection, to determine the probable conditions in the case of each structure, since their demolition or removal will not take place until after the completion of the Weapons Test Facility, which is scheduled for August 23, 1967; a final health survey of all structures will be requested at that time.

Do not monitor Materials Disposal Area 'Q' at this time, as Group H-3 will determine its disposition at a later date.

It will be appreciated if we may receive your recommendations, as soon as possible, concerning the tentative future disposal of the structures so that we may advise LAAO accordingly.
