Dear Mr. Bellows:

The Department of Energy and Los Alamos National Laboratory submitted a Part B Research, Development and Demonstration permit application for the Hydrothermal Processing Unit located in Technical Area 9. The permit application has been reviewed for completeness and determined to be complete. The draft permit will be prepared during the October - December 1993 quarter. Should any further questions arise, the New Mexico Environment Department may request additional information, but only when necessary to clarify, modify, or supplement previously submitted material. Requests for such additional information will not render an application incomplete.
