Anna Maestas
Hazardous Waste Bureau
2905 Rodeo Park Drive East, Building 1
Santa Fe, New Mexico 87505-6303

Ms. Maestas:

SUBJECT: REQUEST FOR EXTENSION AT <90 DAY ACCUMULATION AREA

The Los Alamos National Laboratory (LANL) requests a 30-day extension for the < 90-day hazardous waste accumulation area at Technical Area (TA) 9, Building 208B , (Site ID #2008) . The ninety-day periods ends on July 20, 2003.

The waste in question is a ten-gallon container containing eight gallons of cellulose products, plastics, ceramic pins, plates and glass contaminated with high explosives (no container number). This waste stream would normally be treated at an open burn facility at TA-14 but due to extreme fire danger and erratic winds the Laboratory cannot burn under these conditions. The Laboratory does not have other treatment or disposal options at this time. Due to these circumstances the Laboratory would prefer to wait to treat the waste until the fire danger is lower and the forest fuel moisture levels are back to normal.

If you have any questions please contact Geri Rodriguez at 667-6259.

Sincerely,

A handwritten signature in cursive script that reads 'Jack Ellvinger'.
