Darlene Goering

Subject: Investigation Work Plan and Historical Investigation Report for South Canyons

Remarks:

Steve requested a deviation from the historical investigation report and investigation work plan outlines that are in the Consent Order. The Consent Order requires figures depicting historical soil and groundwater analytical data as part of the work plan. Steve proposed to present this information as part of the historical investigation report because ① it would avoid redundancy and ② historical data is not driving the decision on analytics (all samples will be full suite). I approved this deviation.
