SUBJECT: Spill Response Assessment and Closure of Release ID# 2010-287 Occurring at Monitoring Well R-29, reported to NMED on December 15, 2010

Dear Messrs. Casalina and Hjeresen:

On December 15, 2010, representatives of Los Alamos National Security, LLC (LANS) verbally reported an unauthorized discharge to the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) as required by 20.6.2.1203 NMAC of the Water Quality Control Commission (WQCC) Regulations. The report identified ground water in monitoring well R-29 with recently confirmed detection levels of manganese at 0.214 mg/L which exceeds the WQCC standard of 0.200 mg/L. The source and extent for these exceedances was not provided in the report submitted by LANS, and remains undetermined at this time. The depth at which the exceedances were confirmed in ground water is approximately 1,150 feet below ground surface (bgs). Monitoring well R-29 is associated with Ancho Canyon, at Los Alamos National Laboratory.

Corrective actions to address this release are being coordinated with the NMED Hazardous Waste Bureau (HWB) in accordance with the Compliance Order on Consent (Consent Order) proceeding under the New Mexico Hazardous Waste Act § 74-4-10 and the New Mexico Solid Waste Act § 74-9-36(D) between NMED and the United States Department of Energy and the Regents of the University of California for Los Alamos National Laboratory. Based on the information in the Release/Discharge Notification submitted by LANS to GWQB on December 21, 2010 in accordance with 20.6.2.1203 NMAC, and

Messrs. Jeffrey Casalina and Denny Hjeresen

January 28, 2011

p. 2

because corrective actions are being coordinated with the HWB under the Consent Order, no further action is required at this time for release ID#2010-287. Please continue to coordinate any additional corrective actions related to the release with the HWB.

The GWQB reserves the right to require additional corrective actions not already being required should LANS fail to complete corrective actions to the satisfaction of the HWB. Furthermore, nothing in this letter shall be construed as relieving the United States Department of Energy or LANS, of its obligation to comply with all other applicable federal, state, and local laws, regulations, permits or orders.

If you have any questions, please contact either Jennifer Fullam at (505) 827-2909 or George Schuman, Program Manager of the Ground Water Pollution Prevention Section, at (505) 827-2945.

Sincerely,

William C. Olson, Chief
Ground Water Quality Bureau
