Dear Mr. Garcia:

Subject: NMED-AIP Comments for the Review of RCRA Facility Investigation (RFI) Work Plan, Addendum I, Volume II, for Operable Unit (OU) 1082

The Department of Energy (DOE) Los Alamos Area Office (LAAO) received the New Mexico Environment Department's (NMED) comments for their review of the RFI Work Plan, Addendum I, Volume II, for OU 1082 on October 5, 1994. The comments were forwarded to Los Alamos National Laboratory (LANL) for consideration in revising the work plan.

RFI

DOE has received a Notice of Deficiency (NOD) from the Environmental Protection Agency (EPA) on the subject document, and LANL is currently in the process of preparing a response. As AIP comments often overlap with EPA comments, preparation of a response to EPA may include a coinciding resolution of your staff's comments. As all NOD responses to EPA are also sent to your office by virtue of correspondence copy, your staff will receive a record of any such resolution. Additionally, DOE would like to express appreciation for AIP's review and recommended approval of the No Further Action proposals which were contained in the Addendum I, Volume II submittal of the Work Plan for OU 1082.

Thank you for your time and valued effort in completing your review of the subject document. Should you have any further comments or questions, please do not hesitate to call Brad Martin at 667-6080, or me at 665-7202.

Sincerely,

Bonnie M. Koch
