Santa Fe, New Mexico 87502

Dear Mr. Garcia:

Subject: NMED-AIP Comments for the Review of RCRA Facility  
Investigation (RFI) Work Plan, Volume 1, for Operable Unit (OU)  
1082

The Department of Energy (DOE) Los Alamos Area Office (LAAO) received the New Mexico Environment Department's comments for their review of the RFI Work Plan, Volume 1, for OU 1082 on October 5, 1994. The comments were forwarded to Los Alamos National Laboratory (LANL) for consideration in revising the work plan.

LANL has addressed the majority of the AIP's comments as part of the response to the Environmental Protection Agency's (EPA) Notice Of Deficiency (NOD) dated July 18, 1994. The enclosed Table 1 shows which EPA NOD comments correspond to comments provided by AIP. These corresponding comments, which included the bulk of the AIP comments, were addressed in the NOD response provided to EPA on August 17, 1994. LANL has not yet specifically addressed AIP comments 4, 10, 11, 17, 21, 27, 29, and 37. However, these comments will be considered in the development of the RFI Work Plan Addendum II for OU 1082. Additionally, DOE and LANL appreciate the AIP's review and recommended approval of the No Further Action proposals which were contained in the Volume I submittal of the Work Plan for OU 1082.

Thank you for your time and valued effort in completing your review of the subject document. Should you have any further comments or questions, please do not hesitate to call Brad Martin at (505) 667-6080 or me at (505) 665-7202.

Sincerely,

*B. M. Koch*
