Discussion:

I asked Dave if the TA-16 PRSs (16-031c; 029w; 006g; 029g2; C-16-074; 005d; 034p) have any T+E concerns. This information is needed in order for Don Kellett and I to prepare Ecolisk Checklists. He said there are no concerns; that all areas are grassland with some Pipo; and that 029(g2) is ~500' from buffer of AET in Water Canyon, ~1/4 mile from core, and that it causes no problem.
