**Re: ECORISK Database Release 1.2 (September 2000) Deliverable**

**Cc: Alison Dorries, Lars Soholt, Johnnye Lewis, and Felicia Aguilar**

---

Rich,

Enclosed is a CD-ROM, which contains the ECORISK Database Release 1.2 (September 2000), ECORISK Database Security File, "READ ME" document, and ESL calculation spreadsheets. See the READ ME file on the CD-ROM for more detailed information about the content of the CD-ROM. This is the final deliverable for the fiscal year 2000 for the ECORISK Database Task that was under Lars Soholt's supervision and was contracted through Los Alamos Technical Associates. This release of the database includes updates to ecological screening levels and associated model parameters including revision of twenty chemical/ screening receptor group specific toxicity reference values using the Primary Toxicity Study Evaluation Process (See the Read Me file for a listing of revised values); and a general quality assurance check of all other parameters. This release also includes the revision of the database interface to accommodate new information and achieve more efficient data access and the incorporation of a database default ESL calculation engine. Please, let me know if you have any questions.

Sincerely,

Patricia G. Newell
