Mark,

This e-mail serves as NMED approval for installation of intermediate aquifer well CdV-37-1i as proposed in the document attached to the original e-mail received by NMED today (November 4, 2009 at 3:40 PM). This approval is based on the information available to NMED at the time of the approval. NMED understands that LANL will provide the results of preliminary sampling, any modifications to the well design proposed in the above-mentioned e-mail, and any additional information related to the installation of well CdV-37-1i as soon as such information becomes available. NMED advises LANL to give notice of this installation to the New Mexico Office of the State Engineer as soon as possible. Thank you.

Michael Dale, NMED HWB

 Subject: CdV-37-1i well design proposal

Gentlemen,

Here is our proposed design for CdV-37-1i. Please take a look at the attached and let me know if this design meets your approval. The crew is working nights on this well to avoid conflict with other LANL activities and is ready to start construction tonight, if approved. Sorry for the short review time.

Thanks,

32451

Mark Everett, PG
