Subject: TA-16 Air Dispersion Model

Luciana and Ann-

I have received your email (Ann) and voicemail message (Luciana) stating that compliance with the requirement of the NOD may not be achievable. As you know, NMED has very limited time to incorporate the air dispersion model into the draft Permit. If LANL plans to respond to the NOD by the specified date, NMED will wait for your response. If LANL does not intend to respond to the NOD by the specified date, please notify NMED in writing.

Thank you,
Rebecca
