Hazardous Waste Management Division
InterFirst Two Building
1201 Elm Street
Dallas, Texas 75270

20 1985

Dear Mr. Rhea:

I am in receipt of your letter requesting information regarding land disposal facilities at Los Alamos National Laboratory that are affected by the Hazardous and Solid Waste Amendments of 1985. The following information addresses your request:

1) Due by November 13, 1985 - All information in response to questions 1 and 2 has been supplied, by the Department of Energy, to the Environmental Protection Agency (EPA) on November 8, 1985. This submittal contained the Laboratory/DOE's October 16, 1985 update to the Laboratory's Part B hazardous waste permit application. This Part B permit update responded to the New Mexico Environmental Improvement Division (EID) completeness review of said document dated September 13, 1985.

In response to question 2, Technical Area 54 (TA-54) Area L and Technical Area 16 (TA-16) Area P are hazardous land disposal facilities that were closed November 8, 1985, the statutory deadline.

2) Due by November 27, 1985 - All information responding to question 3 will be submitted to the EID with copies sent to EPA, on or before November 25, 1985.

3) Due by January 10, 1986 - All information in response to question 4 will have been supplied to EPA and the EID in submittals dated October 16, 1985 and November 23, 1985.

If after reviewing the appropriate information referenced above you have any further questions, please call Avedon Gallegos (FTS 843-5288) of my staff.

Sincerely,

Harold E. Valencia
