Re: Closure Plans  
NM0890010515

Dear Mr. Seasons:

In accordance with the New Mexico Hazardous Waste Management Regulations (HWMR-5, as amended 1989), Part VI, 40 CFR §265.112(a), the owner or operator of a hazardous waste management facility must have a written closure plan by May 19, 1981 and, until final closure is certified in accordance with Pt. VI, §265.115, a copy of the most current plan must be furnished to the Director of the Environmental Improvement Division (EID) upon request, including request by mail. On behalf of the Director of EID, I am requesting a copy of your most recent closure plans for the following units at the following technical areas (TAs): TA-35 Waste Oil Storage Pits (#85 and #125); TA-16 Area P Landfill; TA-40 Scrap Detonation Site; TA-54 Areas H, L, and G (trenches, pits and shafts which quality as hazardous waste landfill cells); TA-54 Area L Waste Oil Storage Tanks (contaminated soil).

The plans must address all the requirements of Pt. VI, §§ 265.111 through 265.116. Please submit the closure plans within 60 days of receipt of this letter.

Additionally, any unit that is a landfill or that must be closed as a landfill must have a post-closure plan. Please submit post-closure plans for your landfills within the same 60-day period. These plans must meet the requirements of Pt. VI, §§ 265.117 through 265.120.

Mr. Harry T. Season, Jr.
