SUBJECT: NOTIFICATION OF A SWMU AT TA-16

Dear Mr. Garcia:

The Los Alamos National Laboratory has identified a new solid waste management unit (SWMU). The unit is an abandoned underground storage tank (UST) located at Technical Area 16. The SWMU was identified as a result of routine construction activities being performed by one of our contractors. The unit has been given the unique SWMU number 16-033(k).

The unit is located immediately south of Building 16-500. The UST is a steel tank with a 200-gallon capacity. The product that was stored in the tank was gasoline, which served an emergency generator system. An archival search revealed that the UST was installed in 1952. It has not been determined when the tank was abandoned.

The tank will be pumped of its contents, investigated, and remediated in accordance with the New Mexico Environment Department UST Bureau's regulations. This unit will be added to the work scheduled to be completed in the 1997 baseline.

If you have any questions regarding this unit, or wish to obtain additional information, please contact David McInroy at 667-0819.

Sincerely,

Jorg Jansen
