SUBJECT: FIELD UNIT 3 SAMPLING ACTIVITIES AT TA-16

Dear Mr. Garcia:

Field Unit 3 is planning to perform sampling in support of a partial remediation at Technical Area (TA) 16 on or about May 19, 1997, through approximately June 10, 1997. The sump at potential release site (PRS) 16-029(g) will be removed and the soil below the sump screened. If the soil from below the sump is above PRG levels, then the soil will be removed. Four verification samples will be collected. The sump end of the outfall pipe will be plugged but the outlet pipe and outlet portion of the PRS will remain in place.

Surface and subsurface soil samples will be collected as shown in the table below.

Location	Number of Samples	Sample Type	Analyses
PRS # 16-029(g)	4	subsurface verification	HE, inorganics SVOC, VOC

If you have any questions or concerns, please feel free to give me a call at (505) 667-0819.

Sincerely,

A handwritten signature in black ink, appearing to read "David McInroy".
