Mr. Carl Will, Permits Project Leader  
Permits Management Program  
Hazardous and Radioactive Materials Bureau  
New Mexico Environment Department  
2044-A Galisteo Street  
Santa Fe, New Mexico 87502

Dear Mr. Will:

**SUBJECT: Revised Closure Plan for Technical Area (TA)-16-394 Burn Tray; Los Alamos National Laboratory (LANL), EPA ID# NM 0890010515**

The purpose of this letter is to transmit the attached revised closure plan for the LANL TA-16-394 burn tray. This submittal is made in response to the October 31, 2000 technical adequacy determination letter (HWB-LANL-99-045) from John E. Kieling, Hazardous Waste Bureau (HWB), to John C. Browne, Director, LANL, and David A. Gurule, Area Manager, Department of Energy. The full title of the document is "Closure Plan for the TA-16-394 Burn Tray," Revision 1, January 2001, LA-UR-99-6216, ER2001-0077, and it revises the original plan of November 1999.

This revision of the closure plan incorporates the additional information provided in a July 11, 2000 letter from LANL (ER2000-0326). The information regards high explosive waste descriptions; sand sampling procedures, and the disposal options for hydrocarbon-contaminated materials.

The October 11, 2000 letter from HWB also states that upon receipt of the revised closure plan and associated fees, HWB will approve the plan. The closure plan review fee was submitted to Ms. Cindy Abeyta, HWB, by letter on November 8, 2000, (ESH-19:00-098).

If you have any questions concerning this submittal, please contact Gian Bacigalupa at (505) 667-1579.

Sincerely,

James L. White  
Group Leader
