**ENVIRONMENTAL RESTORATION PROJECT
 COMMUNICATION RECORD**

Date: 3/06/02	Time:	Recorded By: Kenneth Bostick
To: Vickie Maranville	From: Kenneth Bostick	Telephone No.: 667-0326

Affiliation: NMED

Other Parties:
 Dave McInroy, Richard Romero, (LANL), Woody Woodworth (DOE-AL), Bill Criswell (Weston), Terra Nash (IT Corp)

Discussion:
 This communication record documents the decisions made during the February 27, 2002 meeting with Vickie Maranville and Eliza Frank, NMED; Bill Criswell, Weston; Terra Nash, IT Corp; Richard Romero and Paula Bertino, LANL, and myself, regarding additional confirmation sampling in the East Drainage excavation at Material Disposal Area (MDA) P.

Confirmation samples collected from this area in November 2001 indicated that some contaminated material remained in this location. An additional 300 yd³ of soil were excavated from this location and disposed of as hazardous waste.

During the meeting on February 27th, the following decisions regarding additional confirmation sampling were agreed to:

1. Re-sample the four locations (Grid 205, 206, 277 and 278) that had indicated the presence of barium contamination.
2. Collect a duplicate sample in Grid 205, the location that had previously shown the highest concentration of contamination. This sample will be analyzed for Perchlorates as well.
3. Collect three or more samples along the East, South and West edge of the excavation to demonstrate boundary of contamination. Previous sampling determined the Northern boundary.
4. Collect one sample from the location of the waste storage pad.
5. Collect a sample for the stream bottom where the channel comes into the excavation site.

Action Items:
 Deliver communication record to Vickie Maranville to initial.

Distribution:
 V. Maranville, NMED-HWB
 L. Woodworth, DOE-AL
 D. McInroy, LANL/E-ER
 R. Romero, LANL/ESH-19
 C. W. Criswell, Roy F. Weston, Inc.
 T. Nash-Berning, IT Corp
 N. Riebe, LANL/E-ER
 K. Bostick, LANL/EES-10
