**SUBJECT: FIELD COMPLETION NOTIFICATION FOR AREA OF CONCERN  
 16-024(v) AND SOLID WASTE MANAGEMENT UNIT 16-026(r)  
 ACCELERATED CORRECTIVE ACTION AT TA-16**

Dear Mr. Bearzi:

The Los Alamos National Laboratory (LANL) Environmental Programs-Corrective Actions Program has completed characterization and remediation activities associated with the Accelerated Corrective Action (ACA) at Area of Concern (AOC) 16-024(v) and Solid Waste Management Unit (SWMU) 16-026(r). The scheduled activities began on June 12, 2006.

The ACA work plan associated with these activities was submitted to the New Mexico Environment Department (NMED) in April 2006 (LA-UR-06-2577). The oil drainline was successfully located and removed as part of SWMU 16-026(r), and suspect soil was removed and replaced in AOC 16-024(v).

Based on Section VII.F.4 Accelerated Corrective Action Implementation of the NMED/LANL Order on Consent, a remedy completion report will be prepared and submitted to NMED for approval in accordance with Section XI within 90 calendar days of completion of the accelerated corrective action. We anticipate submittal of this remedy completion report on March 30, 2007.

If you have any questions or comments regarding these field activities, or if you wish to arrange a site visit, please contact Melanee Shurter at (505) 667-7369 or at mshurter@lanl.gov.

Sincerely,

Andrew Phelps, Associate Director  
 Environmental Programs  
 Los Alamos National Laboratory

Sincerely,

David Gregory, Federal Project Director  
 Department of Energy  
 Los Alamos Site Office
