(Spring and Surface Water Sampling)

RE: Notification of Sampling at TA-18 by DOE Oversight Bureau

Dear Mr. Johansen:

The DOE Oversight Bureau is planning to conduct sampling activities at TA-18 on Monday July 6, 1998. Activities will include observing any surface-water flow conditions in addition to collecting ground-water and surface-water samples. Sample analyses will include: major cations and anions, HE, dissolved gross alpha/beta, isotopic U and dissolved Ba, B, Mn, Sr, Si, Al, and Fe.

Specifically, the activities will include:

- Sampling water at TA-18 Spring, Threemile Spring, and the old cistern located west of TA-18 (all located in Threemile Canyon).
- Sampling surface water (if present) in Pajarito Canyon near LANL gage E245.

The DOE Oversight Bureau follows all site access and work request protocols required by facility managers (FM) and have been granted the appropriate approval from FMU-74 (TA-18) to conduct the sampling activities on the date above.

If you have any questions or concerns, please contact Chris Hanlon-Meyer at 827-1536 or myself at 672-0448.

Sincerely,

Steve Yanicak,
LANL Point-of-Contact
