NOTICE OF INTENT TO:  
Approve a Closure Plan for Los Alamos National Laboratory Technical Area 21 (TA-21) Building 61 Container Storage Units.

The State of New Mexico is authorized to operate a hazardous waste management program in lieu of the Federal program for those portions of the Resource Conservation and Recovery Act (RCRA) in effect prior to the enactment of the Hazardous and Solid Waste Amendments of 1984 (HSWA). The HSWA impose additional requirements on hazardous waste management facilities which will be administered jointly by the State of New Mexico for those sections of HSWA that the State received authorization for on January 2, 1996 and the U.S. Environmental Protection Agency (EPA) will administer sections that the State did not receive authorization for until the State of New Mexico receives additional authorization for those requirements.

Under authority of the New Mexico Hazardous Waste Act (Section 74-4-1

et. seq. NMSA 1978, as amended, 1989) and the New Mexico Hazardous Waste Management Regulations (20 NMAC 4.1 revised November 1, 1995), the New Mexico Environment Department (NMED) can approve or deny Closure Plans.
